Task Sheet No. 4:
CLASSROOM MANAGEMENT PLAN

INSTRUCTION:

As a pre-service teacher, you are tasked to develop a **Classroom Management Plan** that demonstrates your ability to establish a safe, inclusive, organized, and learner-centered classroom environment. Based on the needs of diverse learners and appropriate classroom management principles, prepare a practical plan that includes clear classroom rules and expectations, routines and procedures, strategies for promoting positive behavior and learner engagement, approaches for addressing challenging behaviors, and measures for maintaining a respectful and supportive learning environment. The output should demonstrate how your proposed strategies can effectively support learning, participation, and positive teacher-learner relationships in an actual or simulated classroom setting.

Note: *This task would help you accomplish the INTENTIONS and WAYS FORWARD part of your lesson plan.*

RUBRIC FOR GRADING:

CRITERIA	EXCELLENT	PROFICIENT	DEVELOPING	BEGINNING
Analysis of the Learning Environment and Classroom Rules (10%)	Establishes clear, specific, gender-fair, and age-appropriate classroom rules that promote respect, responsibility, safety, inclusivity, and positive behavior. Rules are practical, consistently applicable, and aligned with the classroom routines and learning goals.	Establishes clear and appropriate classroom rules that generally promote positive behavior, respect, and responsibility, with minor areas that could be improved. ✓	Establishes some relevant classroom rules, but they may be too general, unclear, or inconsistently connected to classroom needs and expectations.	Provides few, unclear, or inappropriate classroom rules that do not adequately promote a safe, respectful, organized, and supportive learning environment.
Connection to Classroom Routines (20%)	Clearly explains how establishing specific and consistent routines can address the identified challenges.	Explains how classroom routines can address the identified challenges with minor gaps. ✓	Makes a general connection between routines and the identified challenges.	Does not clearly connect the challenges to the establishment of routines.
Classroom Structure, Design, and Arrangements (20%)	Provides a well-planned, safe, inclusive, and functional classroom structure and arrangement that effectively supports learning, movement, interaction, accessibility, and diverse learner needs.	Provides an appropriate and organized classroom structure and arrangement that supports learning and participation, with minor areas for improvement. ✓	Provides a partially appropriate classroom structure and arrangement, but some aspects may not fully support learner interaction, accessibility, safety, or effective learning.	Provides a poorly planned or unclear classroom structure and arrangement that does not adequately support learning, safety, participation, or learner needs.

Strategies for rewards and consequences (20%)	Clearly identifies appropriate, fair, and consistent rewards and consequences that promote positive behavior, responsibility, and learner accountability. Strategies are specific, realistic, and aligned with classroom rules and routines. ✓	Identifies appropriate rewards and consequences that generally promote positive behavior and accountability, with minor gaps in specificity or consistency.	Provides some rewards and consequences, but they are general, inconsistently applied, or only partially appropriate to the identified classroom behaviors.	Provides limited, inappropriate, or unclear rewards and consequences and does not demonstrate how they will support positive classroom behavior.
Learning Opportunities, Monitoring, and Reflection (20%)	Provides diverse and meaningful learning opportunities, consistently monitors learner participation and progress, and demonstrates thoughtful reflection to identify strengths, challenges, and appropriate improvements in classroom management.	Provides appropriate learning opportunities, regularly monitors learner participation and progress, and provides relevant reflection with identified areas for improvement. ✓	Provides limited learning opportunities, with some monitoring of learner participation and progress. Reflection is present but lacks depth or specific plans for improvement.	Provides minimal or inappropriate learning opportunities, demonstrates little monitoring of learner progress, and provides limited or no meaningful reflection for improvement.
Completeness and Accuracy (10%)	The response is complete and accurate, addressing all parts and presenting relevant, specific, and observation-based information. ✓	The response is mostly complete and accurate, with only minor omissions or inaccuracies.	The response is partially complete and accurate, but some important information is missing, unclear, or contains noticeable inaccuracies.	The response is incomplete and/or inaccurate, with substantial information missing or several inaccuracies.

Activity 1: Complete the following table.

CLASSROOM MANAGEMENT	ACTION PLAN
1. Classroom Rules and Behaviors	• Raise your hand and wait to be called before speaking. • Respect classmates and the teacher. Listen when others are talking, no teasing or laughing at wrong answers. • Use a normal voice inside the room. When the teacher gives the attention signal (raised hand or clap), stop and look at the teacher. • Come on time with your materials. Keep your area clean. • Follow instructions the first time they are given. • Routine: enter and settle (bag down, notebook out) → attention signal → recitation/activity → clean-up and dismissal. Practiced in the first weeks so the class stays active but still

	orderly even when it gets noisy. Rules are made together with the class.
2. Teacher-student relationship	• Act as a facilitator who is approachable but firm, with clear boundaries and mutual respect. • Greet students at the door and learn their names quickly. • Call on different students fairly, not just the same active ones. • If a student misbehaves, talk to him or her privately. Never shout or embarrass anyone in front of the class. • 5. Listen and encourage, so students feel safe to answer even if they might be wrong.
3. Classroom structure, design, and arrangements (consider the synchronous, asynchronous, and face-to-face setup)	**Face-to-face:** • Rows with a clear aisle so I can walk around and check on students, and everyone has a clear view of the board. • Talkative students are seated apart or mixed with calmer ones. Students with poor eyesight or hearing sit in front. • Seats can be turned into groups of 4–5. Rules and the sticker points chart are posted on the wall. **Synchronous (online):** • Mic discipline: stay muted until called, use raise hand or chat. Camera is optional. **Asynchronous:** • Tasks and deadlines are posted in the group chat/Google Classroom with neatly labeled module folders. • 2. Flexible submission period, and printed copies for students without internet or gadgets.
4. Classroom safety rules and procedures	• Keep aisles clear. Bags go under the chair or at the back so no one trips. • No running, pushing, or horseplay. Do not touch electric fans, outlets, or wires. • Know the exits and the evacuation area for fire and earthquake drills. Line up quietly and follow the teacher's instructions. • Report any injury or sickness right away so the student can be sent to the school clinic with a classmate. • No bullying, including online. Do not share personal information or class links. • 6. Quick check-in at the start of class.
5. Inclusive classroom practices	• Give all students equal opportunities to participate in discussions, activities, and group work. • Respect the different abilities, learning needs, opinions, and backgrounds of each student. • Give students who need more support clear instructions, examples, or additional guidance during activities.

	• Allow shy or less confident students to share their ideas through writing, pair discussions, or small-group activities before speaking in front of the class. • Make sure that group activities allow everyone to have a role and contribute to the task. • Avoid comparing students based on their abilities or performance and encourage them to support and respect one another.
6. Strategies for rewards (positive behavior) and consequences (negative behavior)	**Rewards:** • Stickers worth 5 points for participation and good behavior (raising hand, helping a classmate, quiet group work, clean-up), not only for correct answers. Points are tallied on a chart and added to class participation. • Praise and a "most behaved group of the day." **Consequences (same for everyone):** 1st time: reminder or non-verbal signal. 2nd time: private talk. 3rd time: change of seat or no stickers for that activity (points already earned stay). If it keeps happening: talk to the adviser/guidance counselor and inform the parents. No shaming and no physical punishment.
7. Learning opportunities	• Recitation with stickers, using a fair rotation so everyone gets a turn. • Think-pair-share before reciting so shy students can join. • Group activities with roles so the noise becomes learning talk. • Short games or quizzes to review. • Questions that make students explain in their own words. • 6. Asynchronous: worksheets or a Google Form quiz.
8. Monitoring and reflection	**Monitoring:** • Roving while students work to keep them focused. • Seating chart to tally who recites, to see who is not participating yet. • Note when the noise goes up (like during group work) and use short exit questions to check understanding. **Reflection:** • Post-lesson log: Did the noise help learning or just disturb? Did only the same students participate? • Adjust seating, routines, or group tasks if something is not working. • 3. Ask students for short written feedback.
