Form No. 1
WEEKLY MENTORING FORM

Name of Pre-service Teacher	Jade Lormie T. Porras
Program/Section	BTVTED -ICT-CH-4A
Name of Cooperating School	Kapt. Jose Cardones Integrated School
Name of Cooperating Teacher	Shella Marie B. Bongalbal
Date Accomplished	October 18, 2026
Mentoring Session No.	

A. OUTPUT/ACTIVITY EVALUATION AND COMMENTS

INSTRUCTION: Kindly provide comments or suggestions and indicate the total score on the activity accomplished by your assigned pre-service teacher for the week. The pre-service teacher shall review the feedback and use it as a basis for reflection and continuous improvement.

Suggestion/s

-Demonstrated effort in preparing the summative test questionnaire and Table of Specifications (TOS). It follows the guidelines in test construction and ensures that the test items are aligned with the learning competencies, appropriate cognitive levels, and intended learning objectives.

Evaluated By:

SHELLA MARIE B. BONGALBAL		10/30/26

Task Sheet No. 7:
ASSESSMENT TOOL WITH TOS

INSTRUCTION:

As a pre-service teacher, you are task to develop a comprehensive assessment tool aligned with the performance standard and learning competencies based on your Budget of Work. Prepare a valid and reliable assessment instrument (summative exam/performance task) that measures students' knowledge, understanding, and application of the concepts covered. The assessment tool must include a Table of Specifications (TOS) that clearly presents the distribution of test items according to the learning outcomes or topics, instructional time allotment, and cognitive levels based on the revised Bloom's Taxonomy. Ensure that the assessment items are appropriate, clearly worded, aligned with the TOS, and proportionately distributed according to the relative importance of each topic. Submit the completed assessment tool together with its TOS and answer key, ensuring that the materials are accurate, organized, and ready for classroom use.

RUBRIC FOR GRADING:

CRITERIA	EXCELLENT	PROFICIENT	DEVELOPING	BEGINNING
Alignment of Assessment to TOS (20%)	Exam strictly follows the TOS distribution (content areas and cognitive levels). The item counts and difficulty levels matches the TOS. ✓	Mostly follows TOS with only minor deviations in content or cognitive level distribution. The item counts and difficulty levels matches the TOS.	TOS connection is visible but with noticeable imbalance in coverage. The item counts and difficulty levels have inaccuracies.	Weak or no alignment to TOS and many items do not match the intended distribution.
Cognitive Level Appropriateness (Bloom's Taxonomy) (20%)	Items accurately follow the cognitive level breakdown set in the TOS and CG. ✓	Most items match intended cognitive levels but with slight imbalance.	Cognitive levels are present but uneven. It leans heavily toward recall-type questions.	Cognitive levels are mismatched or inconsistent with intended skills.
Content Accuracy and Quality (20%)	All items are accurate, error-free, and reflect proper depth for the quarter. ✓	Minor errors or revisions needed with overall good quality.	Most items are correct, but several items lack clarity or depth.	Several inaccuracies or poorly constructed items.
Clarity, Structure, and Organization of Items (20%)	Questions are clear, logical, well-structured, and free from ambiguity. The instructions are easy to follow. ✓	Questions are mostly clear but could be improved in wording or sequencing.	Questions are understandable but some items are vague or long.	Several questions are confusing, misleading or poorly phrased.
Fairness, Inclusivity, and Bias-Free Content (20%)	Questions are fully inclusive, culturally sensitive, and free from gender, socioeconomic, or linguistic bias. ✓	Questions are mostly inclusive with minor improvements needed.	Questions are neutral but lacks representation or inclusivity.	Some items or questions unintentionally show bias.

Competencies (BOW)		Estimated Time for Instructions (Days)	% of items	Target Number of items	ITEM PLACEMENT						ITEM NO.
					R	U	Ap	An	E	C	
1.	Discuss basics of animation, cleaned up, and in-between simple drawings (Introduction to Animation)	3	20%	5	II	II	I				1-5
2.	Produce cleaned-up simple key drawings (Cleaned-up Drawings)	3	20%	5	I	I	II	I			6-10
3.	Produce in-between drawings (Frames in Animation: Keyframes and In-between Frames)	3	20%	5	I	I	II	I			11-15
4.	Produce simple animations (Principle of Animation: Squash and Stretch)	6	16%	4	I	I	I		I		16-19
	Produce simple animations (Principle of Animation: Slow-in and Slow-out)		12%	3	I	I	I				20-22
	Produce simple animations (Principle of Animation: Arc)		12%	3	I	I	I				23-25

SUMMATIVE EXAMINATION IN VISUAL ARTS (TERM 2)- TLE 10

Name: _____ Date: _____

Grade & Section: _____ Score: _____

Instructions: Read each question carefully and select the best answer from the given choices. Write the letter of your choice on your answer sheet.

1. **What creates the illusion of movement in an animation?**
   A. One drawing shown for a long time
   B. Still images shown in quick succession
   C. A colorful background behind the drawing
   D. A recorded sound played along with each drawing
2. **At how many frames per second does standard cinematic animation typically run?**
   A. 8
   B. 12
   C. 24
   D. 60
3. **Why does a flipbook appear to show a moving picture when its pages are flipped quickly?**
   A. The eyes join the drawings into motion
   B. The paper bends into new shapes as it moves
   C. The ink on each page slowly changes position
   D. Each page contains the whole action of the story
4. **What mainly makes an animated character look alive compared with a still drawing?**
   A. Size
   B. Color
   C. Shape
   D. Movement
5. **A student has only paper and a pencil. Which activity would let the student see how animation works?**
   A. Folding a sheet into a small shape
   B. Drawing one large picture on one sheet
   C. Flipping pages of slightly different drawings
   D. Coloring each drawing with many different colors
6. **What is the purpose of a cleaned-up drawing?**
   A. To add more in-betweens
   B. To refine the rough sketch
   C. To select the scene's colors

D. To change the character's pose

7. **Which feature shows that a rough drawing has been cleaned up well?**
   A. It has faint, loose lines.
   B. It still has many sketch marks.
   C. It has clear, steady, closed outlines.
   D. It shows a different pose from the rough.
8. **A rough sketch has overlapping lines and a gap in its outline. What should the animator do to turn it into a cleaned-up drawing?**
   A. Trace clear lines and close the gap
   B. Leave the rough sketch exactly as it is
   C. Redraw the character in a different pose
   D. Keep the overlapping sketch lines as they are
9. **An animator is cleaning up three rough key poses of a jumping ball. Which practice keeps the three cleaned-up drawings consistent?**
   A. Using one line style and ball size
   B. Changing the ball's size in each pose
   C. Using a different outline for each pose
   D. Leaving a few of the poses in rough form
10. **In a cleaned-up key drawing, a character's head is larger and its lines are thicker than in the other key drawings of the same sequence. What is the main problem?**
    A. The drawing lacks a background.
    B. The proportions and lines do not match.
    C. The drawing needs more in-between frames.
    D. The drawing runs at too few frames per second.
11. **What do animators call the major poses that define the start and end of an action?**
    A. Layers
    B. Keyframes
    C. Thumbnails
    D. In-betweens
12. **What is the role of in-between frames in an animation?**
    A. They connect the keyframes.
    B. They add color to the scene.
    C. They choose the story's ending.
    D. They remove marks from sketches.
13. **An animator labels five drawings of a waving hand. Drawing 1 shows the peak of the wave, Drawing 2 the starting position, Drawing 3 the hand returning, Drawing 4 the ending position, and Drawing 5 the middle of the swing. Which order places the drawings on the timeline correctly?**
    A. 1, 2, 3, 4, 5
    B. 2, 5, 1, 3, 4
    C. 2, 1, 5, 3, 4
    D. 5, 2, 1, 3, 4
14. **If each frame needs its own drawing, how many drawings are needed for a 2-second animation that runs at 12 frames per second?**
    A. 12
    B. 14
    C. 24
    D. 48

15. **Animator X places the in-betweens of a ball's movement close together, while Animator Y spaces them far apart between the same two keyframes. Which statement correctly compares the two movements?**
    A. Both balls move at the same speed.
    B. X's ball moves slower than Y's ball.
    C. X's ball moves faster than Y's ball.
    D. The two balls begin at different keyframes.
16. **Which animation principle gives an object a sense of weight and flexibility?**
    A. Arc
    B. Anticipation
    C. Squash and stretch
    D. Slow-in and slow-out
17. **According to the Law of Volume, what must remain constant when an object squashes or stretches?**
    A. Its speed
    B. Its position
    C. Its direction
    D. Its total mass
18. **An animator is drawing the frame where a ball hits the floor. How should the ball look in this frame?**
    A. Perfectly round as before
    B. Bigger in size than before
    C. Flatter and wider than before
    D. Taller and thinner than before
19. **A director says a bouncing ball animation looks stiff and robotic. Which revision is the best way to improve it?**
    A. Add squash and stretch
    B. Use fewer frames for the bounce
    C. Paint the ball in a darker color
    D. Remove the frame where the ball lands
20. **Which description of speed fits an object that follows slow-in and slow-out?**
    A. It keeps one speed throughout.
    B. It is slow at the start and the end.
    C. It is fast at the start and the end.
    D. It stops at the middle of the movement.
21. **How can an animator create slow-in and slow-out when drawing the in-between frames?**
    A. By spacing the drawings equally
    B. By leaving out the in-between frames
    C. By placing more drawings near the keyframes
    D. By removing the drawings that are near the keyframes
22. **An animator wants a car to come to a gentle stop at its last keyframe. How should the final in-between drawings be spaced?**
    A. At equal distances
    B. At random distances
    C. Farther apart each time
    D. Closer together each time
23. **Which statement describes an arc in animation?**
    A. A thick outline style

B. A total count of frames
C. A fixed background position
D. A curved path that a moving part follows

24. Why do animators make a swinging arm follow an arc?

A. Curved paths need fewer frames.
B. Curved paths look natural for limbs.
C. Curved paths make characters smaller.
D. Curved paths replace the need for keyframes.

25. An animator draws a ball tossed from one hand to the other. Which path should the in-between drawings of the ball follow?

A. A curved path through the air
B. A circular path around one hand
C. A jagged path with sharp corners
D. A straight path from hand to hand

ANSWER KEY: SUMMATIVE – TLE10

1. **B** - Still images shown in quick succession
2. **C** - 24
3. **A** - The eyes join the drawings into motion
4. **D** - Movement
5. **C** - Flipping pages of slightly different drawings
6. **B** - To refine the rough sketch
7. **C** - It has clear, steady, closed outlines.
8. **A** - Trace clear lines and close the gap
9. **A** - Using one line style and ball size
10. **B** - The proportions and lines do not match.
11. **B** - Keyframes
12. **A** - They connect the keyframes.
13. **B** - 2, 5, 1, 3, 4
14. **C** - 24
15. **B** - X's ball moves slower than Y's ball.
16. **C** - Squash and stretch
17. **D** - Its total mass
18. **C** - Flatter and wider than before
19. **A** - Add squash and stretch
20. **B** - It is slow at the start and the end.
21. **C** - By placing more drawings near the keyframes

22. **D** - Closer together each time
23. **D** - A curved path that a moving part follows
24. **B** - Curved paths look natural for limbs.
25. **A** - A curved path through the air
